NAME: Token9000

SYMBOL: T9000

Website: Token9000.app

SOL CONTRACT: BkUPooLXGijqy99nZp2wesSEpMoUMCb3qwEYZNfjupx

NETWORK: Solana

Abstract — The Meme Odyssey Begins

Solana speed. Snack energy. Community gravity.

Rather than being a revolution, Token9000 (T9000) is a cosmic inside joke that has been transformed into rocket fuel. Launched on the Solana network in order to provide quick service and affordable food options, T9000 has found a successful niche where cats take naps and hamsters spin. The aim is straightforward: vibe higher, meme harder, nibble longer. There are 1,000,000,000 tokens in circulation, an initial market cap of 30 SOL, and a graduation cap of 245 SOL.

The lore: one hamster fell from a window, one cat reached out with a spare spacesuit, and instead of predator-prey, we got co-pilots. From that unlikely alliance came Token9000 — a Solana meme rocket fueled not by VC money, but by the unquantifiable power of community banter.

DYOR: If you're holding this paper, you're already crew. Buckle up.

The Big Numbers

Anchors in a meme ocean.

SUPPLY: 1,000,000,000 T9000 — A billion tokens, enough to wallpaper the moon.

INITIAL MARKET CAP: 30 SOL 🚀 — Cheaper than a hamster wheel but more fun.

GRADUATION MARKET CAP: 245 SOL 🧠 — Enough for snacks and maybe a hamster moon base.

LP: 100% LOCKED 🔒 — Locked tighter than grandma's cookie jar — hamster-proof.

DYOR: Big numbers are serious. Our commentary is not.

Features — What Fuels the Rocket

Memes, vibes, snacks, repeat.

COMMUNITY FUEL: Astro-Cat memes, Twitter raids, and sticker sharing are great ways to fuel your community. Every meme is thrust.

LOYALTY TREATS: T9000 is patient, just like cats. Snacks will start flowing if you let cats do what cats do for enough time.

ROCKET POST UTILITY: Dogs become bewildered, bulls get petted, and bears get scratched. "Full send" hamster balls to bears when they're not looking.

ECOSYSTEM GROWTH: Solana today, bridges tomorrow. Unless hamster chews wires.

DYOR: Utility = memes + morale. Don't overthink it.

How to Buy — Smart Degen Guide (Meme Edition)

Full Send "HBALLS" Also works.

Step 1 — Wallet: Phantom, Solflare, or Backpack. Don't DM cats on Telegram.

Step 2 — Fund with SOL: Wallets eat SOL, not snacks.

Step 3 — Jup.ag (The Degen's DEX): Swap SOL → T9000. Pretend you understand liquidity.

Step 4 — HODL Snacks: Post memes. Guard snacks. Laugh at charts.

Real steps: token9000.app

DYOR: Not financial advice. Snack advice.

Roadmap — Mission Control Logbook

MEME meets milestones.

2025 Q4 — Launch Ignition: Website and socials go live. Astro-Cat presses shiny button.

2026 Q2 — Community Tools: Meme dashboards, hamster analytics, snack trackers, T9000 Web Tool.

2026 Q3 — Airdrop: Snacks for OGs, creators, hamster-whisperers.

2026 Q3 — NFT Marketplace: Astro-Cat & Hamster collectibles with quests.

DYOR: Roadmaps are hopes. Snacks are real.

Community Culture — The Spaceship Rulebook

We HODL snacks, not grudges.

Rules:

1. Snacks before stress.
2. Cats and hamsters are equals.
3. No rugpulls, only snack pulls.
4. Bears muted, bulls petted.
5. Memes first, charts second.
6. Respect the snacks.

DYOR: Community > charts. Snacks > stress.

DYOR & Disclaimers — Seriously

Moon responsibly degen.

Neither a retirement strategy nor insurance for hamsters. Do not encumber your spacecraft with a mortgage. Do not sell grandmother's cookies to the ape. Presenting this to a financial advisor will likely result in their disengagement. DYOR signifies researching, reflecting humorously, and subsequently making a decision. Previous snacks do not equate to future snacking.

Respect the Snacks. DYOR. To the Meme-Moon 🚀
